Heading	Details
Impact on Shareholders	<p>In consideration of the impacts on the Company's shareholders, it will be taken into consideration the impact of the Convertible Debentures in case the Company issued and offered Convertible Debentures to investors. In this regard, two aspects of the impacts on the shareholders of the Company will be taken into consideration, which are, impact to the market price of shares (Price Dilution) and impact to the voting rights of existing shareholders (Control Dilution), with details as follows:</p> <p>(1) Price Dilution</p> <p>Price Dilution can be calculated from the following formula:</p> $\text{Price Dilution} = (\text{Po} - \text{PE}) / \text{Po}$ <p>Whereas;</p> <p>Po = The existing share price, which is 0.0571 Baht per share, is based on the weighted average price of the Company's shares listed on the Stock Exchange of Thailand for the past 15 consecutive business days prior to the date on which the Board of Directors resolved to propose the agenda to the Extraordinary General Meeting of Shareholders No. 1/2023 to consider and approve the issuance of newly issued ordinary shares to accommodate the conversion of convertible debentures to a private placement, which is between September 27, 2023 and October 18, 2023.</p> <p>Pe = The conversion price of convertible debentures at 90% of the market price assuming equal to Po, which is 0.0514 Baht per share.</p> <p>PE = share price after the offering of convertible debentures, where;</p> $\text{PE} = ((\text{Po} \times \text{Qo}) + (\text{Pe} \times \text{Qe})) / (\text{Qo} + \text{Qe})$ <p>Qo = Existing shares, which equal to 15,588,084,990 shares</p> <p>Qe = Number of shares arising from the conversion of convertible debentures which number of shares allocated to accommodate the conversion amounts to 2,855,926,276 shares.</p> <p>Therefore</p> $\text{PE} = (0.0571 \times 15,588,084,990) + (0.0514 \times 2,855,926,276) / (15,588,084,990 + 2,855,926,276)$ $\text{PE} = 0.0562 \text{ Baht per shares}$ $\text{Price Dilution} = (\text{Po} - \text{PE}) / \text{Po} = (0.0571 - 0.0562) / 0.0571 = 1.55\%$ <p>In the event that the convertible debentures are fully exercised into ordinary shares of the Company, will affect the stock's market price by 1.55% , which is the case when the Company issued and offered the most convertible debentures at the conversion price equal to 90% of the Po.</p> <p>(2) Control Dilution</p> <p>Control Dilution can be calculated from the following formula:</p> $\text{Control Dilution} = \text{Qe} / (\text{Qo} + \text{Qe})$ <p>Whereas;</p> <p>Qo = Existing shares, which equal to 15,588,084,990 shares</p> <p>Qe = Number of shares arising from the conversion of convertible debentures which</p>

	<p>number of shares allocated to accommodate the conversion amounts to 2,855,926,276 shares.</p> <p>Control Dilution = $2,855,926,276 / (15,588,084,990 + 2,855,926,276) = 15.48\%$</p> <p>In the event that the convertible debentures are fully exercised into ordinary shares of the Company, the control dilution of the shareholders will be 15.48%.</p>
Other Information	<p>The details described above are the summary of the Terms and Conditions of the Convertible Debentures and are still subject to change. Further relevant details will be stipulated in the terms and conditions of the Convertible Debentures.</p>
Objectives of issuing convertible debentures and plans for utilizing proceeds	<p>Please consider the objectives of issuing convertible debentures and plans for utilizing proceeds as detailed in the Capital Increase Report Form (F53-4) (Enclosure 3)</p>
Board of Directors' Opinions	
Reason, necessity, and suitability for the issuance of convertible debentures, including analyzing the Company's ability to repay shareholders who do not exercise their conversion rights at maturity date.	<p>The Board of Directors is of the opinion that fundraising by issuing and offering convertible debentures is a good choice to increase the Company's capital, to increase liquidity, and for fast fundraising to adapt to the rapidly changing stock market and environment conditions. This will benefit the Company's business operations in order to increase its financial liquidity and to expand investments when the Company has a need in a timely manner. It also helps to reduce the financial cost of the Company in the event that the capital increase is used to pay off debts, including increasing the stability and sustainability of the financial position of the Company, which will undoubtedly strengthen and stabilize the Company's financial position. It also restructures the appropriateness of the Company's capital structure and to increase financial liquidity, which results in a lower financial cost for the Company. The Company can use the money to generate income from investments and business development of the Company and/or invest in new businesses that are related to or supports the business that is currently operating. This will generate returns for the company and shareholders in the future. In addition, this fundraising will also benefit the company and shareholders, as detailed in the Capital Increase Report Form (F53-4) (Enclosure 3). However, in the event that the Company has issued convertible debentures and the convertible debenture holders do not exercise their convertible rights at maturity date, the Company expects that its future cash flow should be sufficient for business operations. In addition, if necessary, the Company may issue and offer newly issued ordinary shares to shareholders or private placement, which is another solution. However, the Company will consider the appropriateness during that particular time to decide again.</p>
Possibility of the plan for utilizing funds	<p>The Company expects to proceed with the issuance and offering of newly issued shares to investors as well as to receive money from the sale of such newly issued shares within 1 year from the date that the shareholders' meeting approved to offer for sale the newly issued shares. However, if the Company does not receive money from this capital increase, the Company may lose the opportunity to expand its business according to the Company's business plan in the future.</p>

Heading	Details
<p>Expected impacts on the Company's business operations, including its financial position and operating results due to the capital increase</p>	<p>Increasing the Company's registered capital by issuing convertible debentures will strengthen both its financial structure and increase its financial flexibility to invest in future projects. Therefore, such capital increase will not adversely affect the business operation, financial position, and performance of the Company.</p>
<p>Directors' Testimonials</p>	<p>In the case that the directors of the Company fails to perform their duties with honesty and diligence to protect the interest of the Company with regards to this capital increase, if such failure to perform duties causes damage, shareholders can sue for damages from the said director on behalf of the Company in accordance with Section 85 of the Public Company Act B. E. 2535 and if the performance of such duties causes the Board of Directors or any person involved to wrongful gains, shareholders can use the right to sue to recover benefits from that director instead, in accordance with Section 89/18 of the Securities and Exchange Act B.E. 2535 (as amended).</p>
